

Schenker is participating in SEMICON[®] China2006

Schenker is participating as exhibitor in the SEMICON China 2006.

This tradeshow is organised by SEMI (Semiconductor Equipment & Materials International) attracting many industry leaders, high ranking management, purchasing directors as well as engineers.

Over 1,000 global suppliers such as equipment and material companies, EDA firms, fabless foundries, IP providers and design services are expected at SEMICON China 2006.

The tradeshow will take place from March 21 to March 23 (9am to 5pm) at Shanghai New International Expo Center in Pudong.

In order to promote Schenker's services to the Semiconductor Industry, Schenker Asia Pacific has decided to participate with an own booth.

Schenker Semicon specialists from all over the world warmly welcome you at booth number 2263!

New local IT management systems!

Since February 2005, our IT department successfully developed and implemented seafreight export and airfreight Hub management systems internally.

Those local systems allow information consolidation on bookings in both transportation modes.

Work efficiency, accuracy and faster execution of tasks represent the main benefits from these management systems.

Complementary with the global system, the new systems support our staff to provide a better performance everyday!

Schenker China Ltd. – ISO 9001:2000 certified!

On January 29th 2006, TÜV Nord recognized that Schenker had successfully established and applied a quality management system for provision of sea & airfreight forwarding as well as removal services.

Since a long time already, quality management constitutes an integral part of Schenker China's management system.

ISO 9001:2000 specifies requirements for a quality management system for an organization that needs to demonstrate its ability to consistently provide products and operational processes aimed at meeting customer requirements and enhancing customer satisfaction.

Our company's goal is to strive for business excellence, continuous optimization of process levels, data and service quality.

Schenker China's Quality Policy states as following:

"Our goal is to provide our customers with reliable, accessible, secure, efficient, and punctual services.

We are devoted to achieve total customer satisfaction and continual improvement

of our service quality."

In order to realize the quality policy, Schenker established its customer focused quality system in 2005.

With the involvement and efforts of all staff and departments, Schenker China received the certificate issued by TÜV Nord on January 29, 2006.

DB group updates

BAX Global & Schenker – New Global Logistics Powerhouse!

Deutsche Bahn AG (DB) has announced the successful acquisition of BAX Global on January 31, 2006. This acquisition enables DB to move into the global arena of top logistics companies.

The complementary nature between BAX and Schenker brings a host of service and product synergies that we can now offer our customers. Together, we have very strong network coverage in Europe, the Americas and Asia Pacific.

For each major region, we have now established joint Regional Project Teams. These teams are reviewing short-term opportunities, as well as preparing for long-term synergies based on the following principles: customers come first, optimizing our network and resources, leveraging these strengths to improve our competitiveness!

For more information please do not hesitate to contact us: marketing.sha@schenker.com

Did you know?

That right now...

...Schenker and BAX Global combined networks rank:

- Number 1 in land transport in Europe
- Number 2 in airfreight worldwide
