

Good Luck Beijing Sailing Test Event

Schenker China Ltd was the Partner for Logistics and Freight Forwarding services for the Good Luck Beijing – Qingdao International Sailing Regatta 2007. Schenker provided solutions and services to the Qingdao Sailing Committee as well as to the many stakeholders involved such as Sponsors, Suppliers and Sailing Federations. Compared with last years' role for the same event, this year brought even greater responsibilities for on-site services such as local transport, carnage, material handling and equipment storage.

Schenker's dedicated team in Qingdao has built a strong relationship with the Qingdao Sailing Committee and the major Sailing Federations and is looking forward to being a key service provider for the Olympics and Paralympics in 2008.

SCHENKERaeroparts
Advanced Logistics Solutions for the Aerospace & Defence Industry

The 14th presentation of the Asian Aerospace International Expo and Congress will for the first time in its history take place in Hong Kong from September 3-6, 2007 at the AsiaWorld-Expo Center. For the past 25 years this has been Asia's premier aerospace event with a strong focus on commercial aerospace. The tradeshow is being organized by Reed Exhibitions Aerospace & Defence Group and officially supported by the General Administration of Civil Aviation of China (CAAC), offer-

ing business and networking opportunities to all companies working within the commercial aviation supply chain. With **SCHENKERaeroparts** - a specialized business unit - we cater to the aerospace industry's specific demands and requirements by providing a comprehensive range of transportation and logistics services. This year, the **SCHENKERaeroparts** team once again shows its expertise in this key market, participating at the fair with an own booth in order to create a communication

platform to discuss the latest developments, leading technologies and best business practices with its customers. Schenker's aeroparts specialists are looking forward to meeting you at the Schenker stand location in Hall 9, No. 9E13. For further details, please send an email to: melanie.prestipino@schenker.com or visit the exhibitions' official website: www.asianaerospace.com

Guangzhou Airport signs cooperation agreement with Schenker

Guangdong Airport Management Corporation, Guangzhou Baiyun International Airport Co., Schenker China Ltd and BAX Global have signed a co-operation agreement. According to the terms of the agreement, Baiyun Airport will set up a management system to provide greater convenience to freight forwarders. In return, Schenker's extensive global service network will benefit the airport by bringing in more cargo. Between 2007 and 2008, Schenker is

expected to transport more than 10,000 tons of international cargo through Baiyun, which will account for about five percent of the airport's total volume of international cargo. Guangdong Airport Management Corporation CEO Liu Zijing said Schenker's merger with BAX Global has resulted in an annual growth of more than 50 per cent in Baiyun's cargo throughput. The general manager of BAX Global's Guangzhou branch Huang Yongzhong said the com-

pany's cargo volume has been rising at a pace of over 30 percent annually in the recent years and the company handled about 4,000 to 5,000 tons of cargo at Baiyun Airport last year. Schenker and BAX Global are both wholly-owned subsidiaries of Deutsche Bahn. The China integration is expected to be completed soon after which the fully merged company will operate under the Schenker name.

Did you know?

- China is considered to be one of the fastest-growing aviation markets:
- Chinese domestic passenger numbers are forecasted to rise from 220 to 950 million by 2020.
