Did you know?

- China has suspended the planned construction of a new high-speed magnetic levitation train route linking the eastern cities of Shanghai and Hangzhou. The reason it has been suspended is that there are said to be radiation concerns. The track was due to be in operation by 2010, in time for the World Expo.

Schenker's participation in the China International Logistics Technology and Services Expo 2007 in Suzhou

The China International Logistics Technology & Services Expo 2007 was held from May 23 to 25, 2007 at the Suzhou International Expo Center. It was organized by the Jiangsu Provincial People's Government and the Suzhou city government. A series of events took place during the trade show, including a two-day forum on China International Logistics and Supply Chain Management Development, which allowed for information exchange between Chinese officials and foreign and domestic logistics companies.

Over 200 exhibitors from three different sectors – logistics technology, logistics equipments and logistics

services – attended the fair. As Suzhou and the whole region is very important for Schenker, the company participated with an own 100sqm booth. More than 8,000 visitors came to the fair to get information about the latest logistics technol-

ogy and products. To better understand the needs of its customers and to further strengthen well-established business relationships in the region, a customer event was held by Schenker on May 17 in the restaurant Nicolas-Etienne.
